

sofa care guide

You've found **the one.
Comfy, stylish & just
your type.**

So-fa, so good!

Now here's how to keep your sofa looking & feeling its best for years to come...

Looking After Your Sofa

We're here to share some handy tips to help keep your sofa looking fresh & fabulous! For more stubborn stains or deep cleaning, we recommend calling in a professional upholstery cleaner to keep your sofa in top-notch condition.

General Care

Keeping your sofa in tip-top shape doesn't have to be a hassle. A **quick weekly vacuum** using the upholstery attachment is a simple yet effective way to keep dust from settling in, especially on armrests & cushions.

To keep your sofa's structure in great shape, **avoid sitting on the armrests or the edges of the cushions**. Switch up your seating spots to help distribute wear more evenly. **Got pets?** Consider popping a throw over the sofa to protect against claws & shedding – plus it adds an extra cosy touch!

Spot Cleaning

If you have a spill, act fast! **Gently blot the area with a clean, dry cloth** to absorb moisture. Avoid rubbing – this can push the spill deeper into the fabric. We advise against adding water or cleaners, as they could leave marks or discolouration. **For anything tricky, it's best to call in the pros.**

Read on...

Fabric Upholstery Care

Fabric sofas add a lovely warmth & softness to your space – and with a little regular care, they'll stay looking their best. For day-to-day upkeep, a **gentle dusting with a soft brush** or upholstery attachment does the trick. **Avoid direct sunlight** to prevent fading, and try to **keep it away from radiators** or heaters, which may dry out the fibres.

Leather Upholstery Care

Leather has a timeless look and can age beautifully. **A weekly dust** with a soft cloth will keep it clean, and every few months, give it a **gentle wipe with lukewarm water & mild soap**, using a slightly damp cloth. Be sure not to soak the leather. Simply wipe it, then let it air-dry naturally.

Faux Leather Care

Faux leather is both stylish & easy to maintain. **Dust it regularly** with a soft, dry cloth, and wipe it down occasionally with a damp cloth to keep it looking sleek. **Avoid harsh chemicals** as they can damage the surface. **Keep out of direct sunlight** to prevent cracking and fading.

Linen Upholstery Care

Linen has a beautifully airy, natural feel & benefits from gentle handling. **Vacuum it weekly** using an upholstery nozzle to clear dust.

If you have any spills, **blot right away** with a dry, absorbent cloth. **Avoid direct sunlight** to maintain its colour. For spot cleaning, it's best to **consult a professional** to prevent shrinkage or colour changes.

Velvet Upholstery Care

Velvet upholstery can show pressure marks, which is completely natural. To restore the softness, **brush gently with a soft brush**. Keep out of direct sunlight, as it's prone to fading, so **choose a shady spot**.

Cushion Care

Feather & fibre-filled cushions are super comfy but need a little love – **plump & rotate regularly** to keep their shape. Cloud sofas with fixed seat cushions require a **gentle beat** to redistribute the filling. Removable covers look their best with a quick spot clean or the occasional professional refresh.

Wood & Metal Sofa Legs

Dust occasionally with a soft, dry cloth. For wood, **avoid solvent-based cleaners**, as they can damage the finish. Metal can be wiped with a damp cloth, but dry thoroughly.

*Now time to put
your feet up!*
